

When we decided to remodel our +100 year old Toronto row house we met with several companies to take on the complex job which included structural work, remodeling of the original home and an addition. SalDan immediately stood out from the rest with their professionalism, integrity and attention to detail. Working with on this project with SalDan was a pleasure from start to finish, the team led by Joey was incredibly responsive to our needs, efficient and never compromised on quality. We are so pleased with the final results, the standard and level of commitment to building our home was held exceptionally high by the SalDan team and we are forever grateful.
